

IDENTITY VERIFICATION AND ENROLLMENT SYSTEM FOR SELF-SERVICE DEVICES

ABSTRACT OF THE DISCLOSURE

5

A method and system are provided for authorizing a customer to perform transactions with a self-service device. A first set of biometric data regarding the customer is extracted from a verification instrument. A second set of biometric data is extracted directly from at least one feature of the customer. Textual data regarding the customer is extracted from the verification instrument. The first and second sets of biometric data are compared to determine whether they are derived from a single individual. If so, customer identification information is recorded.
